Projects

My Website – Personal website/RESTful API (still in development)

· http://rogerespinoza.herokuapp.com/ Build with nodejs, bootstrap

· It is being used as a Restful api server for my android chat app

· Github - https://www.github.com/wjk232

Locker(app) – unified cloud storage android app (team project)

· Integrate three cloud API's (Google Drive, Dropbox, OneDrive)

· Used a little bit of rxJava for the creation of new threads

It was a team achievement

· Website – www.lockerapp.us

Messaging(app) – encrypted messaging android app (school project)

Created with android studio and a little bit of rxJava

Implemented instructor web server API

Websites(app) – Facebook like website and programming languages search website (school project)

Created with Laravel, JavaScript, HTML, SQL, ajax

Created a Database server to store user's information and used encryption for passwords

With Laravel as backend SQL was use to get users information

Programming languages website- Team work, I oversaw the Data Structure, and Backend

Games – three simple games (own project, sophomore year)

Website – https://play.google.com/store/apps/developer?id=CYR&hl=en

Created with unity

Used Java as the main language
